The Iași National Theatre in Iași, Romania, is the oldest national theatre and one of the most prestigious theatrical institutions in Romania. In 1956, it was given the name of the renowned Romanian playwright and poet Vasile Alecsandri.

The Iași National Theatre in Iași, Romania, is the oldest national theatre and one of the most prestigious theatrical institutions in Romania. In 1956, it was given the name of the renowned Romanian playwright and poet Vasile Alecsandri.

With a Neoclassic exterior and a richly decorated interior in Rococo and Baroque styles, the building is considered one of the most elegant in Romania.

The main auditorium is organised in stalls, boxes and a balcony. The curtain painted by the Viennese M. Lenz, presents in the middle, an allegory of life with its three stages and, to the right side, the allegory of Romanian Unification. The left-hand side, painted by Lenz's apprentice, differs from the rest of the curtain in style and colouring.

The ceiling and the iron curtain were painted by Alexander Goltz. The iron curtain, which completely separates the scene from the hall, shows ornaments placed symmetrically, while the ceiling has as a narrative basis the Archetypal Story, shown in paradisiacal allegories, with nymphs and cupids framed in rococo stucco.

The 1418 electric lights and the chandelier with 109 Venetian crystal lamps light up a playhouse with a unique architectural personality.

The Iași National Theatre building is listed in the National Register of Historic Monuments.

20:00-22:00 Get together Cocktail at the City Hall (Roznovanu Palace)

Roset-Roznovanu Palace was built in the second half of the 18th century, and rebuilt between 1830 and 1833 by lordache Ruset-Roznovanu, a member of the Rosetti family.

During World War I, it hosted the Romanian government. Today it hosts the Iași City Hall.

The Roset-Roznovanu Palace is listed in the National Register of Historic Monuments.
